Topic: Wastewater Treatment Plant  
Upgrade Project

A public hearing will be conducted for informing citizens and soliciting public input, written or oral, regarding the Boxelder Sanitation District Wastewater Treatment Plant Project Needs Assessment (PNA) and Environmental Assessment (EA.) The PNA is a report detailing the project consisting of plant upgrades to provide additional capacity improved biosolids handling. The reports are being submitted to the Colorado Department of Public Health and Environment (CDPHE) to qualify the Boxelder Wastewater Treatment Plant for a State Revolving Fund Loan.

Included in the PNA are detail of the current wastewater system structure and operation, project purpose, existing facilities analysis, facility planning analysis, assessment of alternatives and the selected alternatives. The selected improvements include modifications to the existing headworks and pump station, additional oxidation ditch secondary treatment processes. secondary clarifiers, UV disinfection improvements, solids pumping, new digesters and solids handling facility.

The work will occur on the existing plant site which eliminates impacts to potential wildlife and endangered species. There will be no impacts to wetlands and the site is located above the 100-year flood limit. The proposed improvements will allow the District to provide reliable and compliant wastewater service to its customers for the long term in a cost-effective manner. The estimated capital investment for the project is \$34M. The purpose of the WWTP project is to provide exceptional treatment of wastewater prior to discharging into Boxelder Creek for current and future customers of Boxelder Sanitation District.

Copies of the PNA and EA are available for public review prior to the Public Hearing at the following location:
